

→ Métodos de Desenvolvimento de Software: 31 de Outubro de 2016 (1º teste)

→ Part 2: Project Management

(a)

(b) caminho crítico: A → C → D → H → J → M → N → Q → S

(c) 67

(d) 65

(b)

→ Parte III: EVIT (h)

$$SV = EV - PV = 5500 - 10500 = -5000 < 0, \text{ Logo está dentro de}$$

$$SP\% = EV / PV = 5500 / 10500 = 55 / 105 = 0,52 < 1, \text{ Logo arrendado}$$

$$EV = EV - AE = 5500 - 6000 = -500 < 0, \text{ subestimado}$$

$$EP\% = EV / AE = 5500 / 6000 = 55 / 60 < 0,92 = 1$$

→ Parte III: Software

B1. E

B2. C

→ Parte IV: Casos de uso

B3. (A) e (B)

B4. (E)

B5. (A)

Extension point: create account

Desc: the client creates an account on the system

Actors: client

Pre-condition of segment: the client doesn't have an account

Fluxo: 1. The client inserts their information
2. The system saves the data

Pos-condition: there's a new account on the system with the client's info
